

MATEJ NAVARA

FULL STACK SOFTWARE ENGINEER

PROFILE

As a seasoned Full Stack Software Engineer, I specialise in creating and enhancing frontend, backend and infrastructure systems using a variety of tech stack configurations. I enjoy following the latest scalability, security and performance best practices to ensure project success.

My professional journey includes pivotal contributions to the entire product development lifecycle—from system design and implementation to rigorous testing and maintenance both at large scale organisations as well as early stage start-ups.

I am passionate about innovative products and adapting to the ever changing demands of software.

WORK EXPERIENCE

Lead Developer

[introstars](#)

Jul 2024 - Present

Remote / London, UK

Leading development on a bespoke B2B introductions marketplace built with Nuxt / Vue.js on Firebase and Google Cloud.

Key Achievements:

- Rearchitected the project for scale with automated deployments, improved data security and service stability as well as numerous quality of life features prior to successfully expanding the application to the US.

Senior Front-End Engineer

[Once For All](#)

Jun 2022 - Jun 2023

Remote

Large scale micro-service based project for a merger of multiple large European construction companies. Working across multiple web applications and component libraries in React/Next.js.

Key Achievements:

- Implemented a micro-frontends solution for shared component libraries, reducing redundant deployment frequency from multiple per update to just once, significantly optimising efficiency and resource usage.
- Formed a Frontend Guild to unite the function across numerous teams to align best practices, address overarching technical debt and knowledge exchange.

Senior React Native Developer

[Healios](#)

Apr 2021 - Apr 2022

Remote / London, UK

Developing innovative mobile applications within the digital health space to improve mental health services for both children and adults. My role involved maintaining and developing two React Native healthcare apps on iOS/Android which had to pass medical device approval.

Key Achievements:

- Incorporated much needed mobile continuous integration and continuous deployment (CI/CD) practices. The processes allowed for much faster build/release execution and frequency. From one release a month to 2-3 per week, greatly improving progress.

Full Stack Developer

[Feedr](#)

Mar 2018 - Sep 2020

Remote / London, UK

Fast-paced development within a rapidly growing food tech start-up. Providing ongoing full stack software development and maintenance for products including: legacy Angular app, React progressive web app (PWA), iOS/Android mobile apps, core API and a backend micro-service.

Key Achievements:

- Developed our React Native applications from the ground up in a small team of 2 devs.
- Helped grow the dev team from 2 to 10; interviewing, onboarding and supporting new members.
